1 Questions

1. How big was the insurance .csv file (once uncompressed)? (i.e. what was the output in 3(e)?) Answer: 5 MB

2. How many lines did the CSV file have before doing the end-of-line (EOL) conversion? (see 3(g)) Answer: My output says "0", which is obviously not correct though i am not sure how to fix it. (update: figured it out)

3. How many lines did the CSV file have after doing the EOL conversion? (see 3(j)) Answer: 36,634
